

SAUDI ARAMCO CYBERSECURITY CHAIR SEMINAR SERIES

Building the Critical Infrastructure of
Tomorrow on a Foundation of Cybersecurity

Effective cyber risk management through enhancing organizational capacity for cybercrime investigations

Organized By
Information & Computer Science Department

In this talk, I will advocate a cybercrime investigative approach to security and resilience to protect national infrastructure, businesses and society from cybercrime. After presenting the current issues, challenges and good practices in cybersecurity, I will discuss how risk management can improve decision making based on fact-based risk assessment. Finally, I will share some lessons I learnt through heading the Cyber Investigation Knowledge Forum in Japan.
